Mazola fried 241/2 pounds of potatoes -lard fried only 7 pounds 14 ounces!

THAT Mazola is a better and I more economical frying fat than lard has again been demonstrated. This time by Mrs. A. Louise Andrea, admittedly one of the greatest experts in modern cookery.

Mrs. Andrea found that 4 lbs. of Mazola, cooked down to 2 lbs.. fried 241 lbs. of potatocs. While 4 lbs. of lard cooked down to 2 lbs. tried only 7 lbs. 14 oz. potatoes.

Tested on fish steaks, one luch in thickness, Mazola fried 25 1

lbs., while lard fried only 1612 lbs. of fish.

Of doughnuts cut uniformly 2 ; inches in diameter, Mazola fried 208, while lard fried only

This proves conclusively that Mazola goes more than three times as far as lard for frying potatoes; almost twice as far for fish; and two-thirds farther than lard in frying doughnuts.

No housewife who wants to use the most wholesome, as well as the most economical cooking and salad oil, thould fail to order Mazola from her grocer today.
